## Introduction

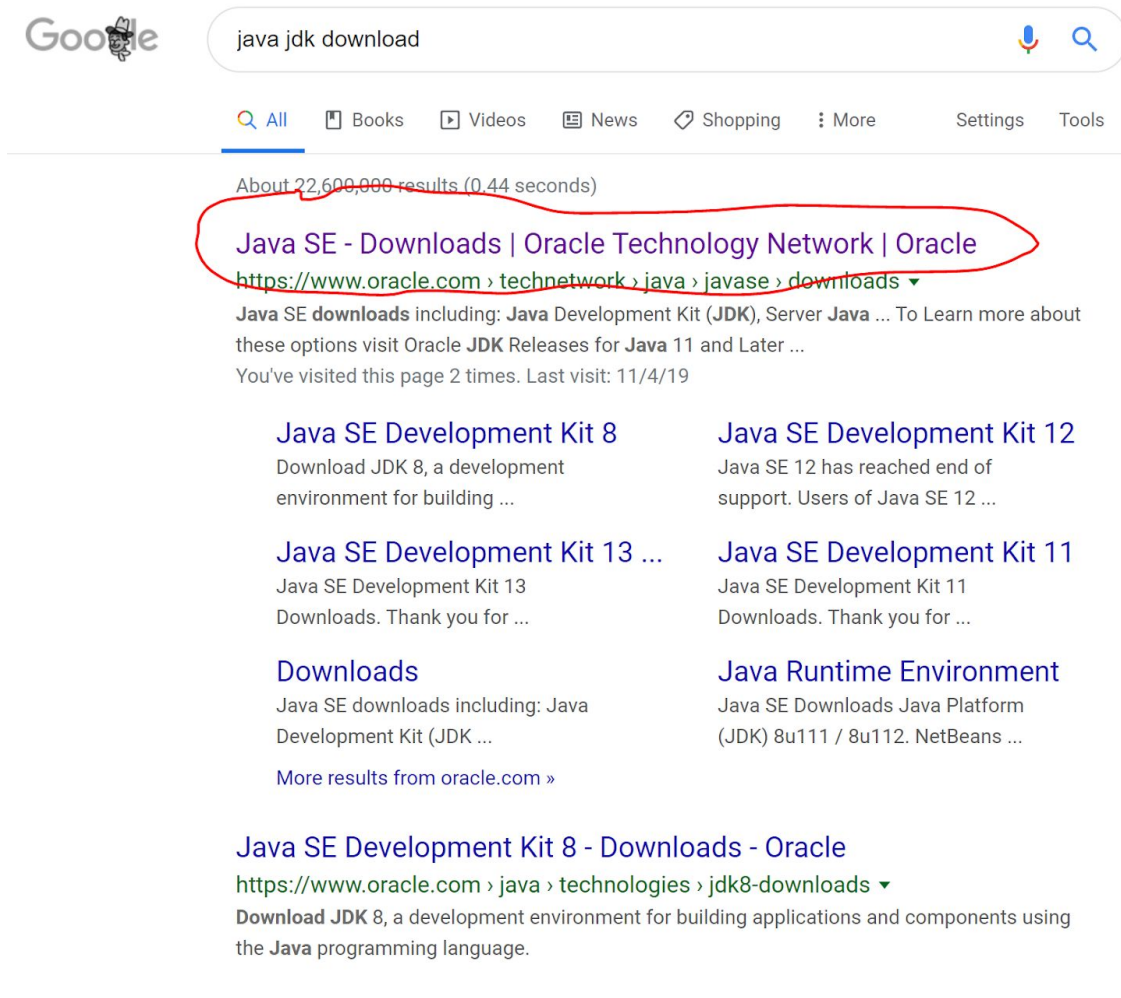

This HoA website allows users and administrators to access relevant information about the community, such as pending service tickets or important documents. This website where homeowners can submit tickets, view documents related to the Homeowners Association, and for administrators to be able to edit tickets that are sent in. The site will only be accessible for those who are apart of this association.

# Installation

## Part A Java Installation

- 1) Please navigate to:  
<https://www.oracle.com/technetwork/java/javase/downloads/index.html> (as of 11/4/2019).
- 2) If the previous step worked, please skip to step 3. If the link is broken, please go to “google.com” and type “Java SDK Download,” and click on the

result from “oracle.com”. This should be the first link that pops up:

Google 

java jdk download

**Java SE Development Kit 8 - Downloads - Oracle**

<https://www.oracle.com/java/technologies/jdk8-downloads> ▼

**Download JDK 8**, a development environment for building applications and components using the Java programming language.

- 3) Once here, please download the latest Java SE JDK. This will be the .exe file for the JDK Number:

Java SE Development Kit 13.0.1		
You must accept the <a href="#">Oracle Technology Network License Agreement for Oracle Java SE</a> to download this software.		
Thank you for accepting the Oracle Technology Network License Agreement for Oracle Java SE; you may now download this software.		
Product / File Description	File Size	Download
Linux	155.88 MB	<a href="#">jdk-13.0.1_linux-x64_bin.deb</a>
Linux	163.17 MB	<a href="#">jdk-13.0.1_linux-x64_bin.rpm</a>
Linux	180 MB	<a href="#">jdk-13.0.1_linux-x64_bin.tar.gz</a>
macOS	172.78 MB	<a href="#">jdk-13.0.1_osx-x64_bin.dmg</a>
macOS	173.11 MB	<a href="#">jdk-13.0.1_osx-x64_bin.tar.gz</a>
Windows	159.84 MB	<a href="#">jdk-13.0.1_windows-x64_bin.exe</a>
Windows	178.99 MB	<a href="#">jdk-13.0.1_windows-x64_bin.zip</a>

- 4) Once it downloads, please navigate through the download wizard and change the download location to: \Desktop\Latest\_JDK\

NOTE: The default location is incorrect! Your wizard **must** look like this:

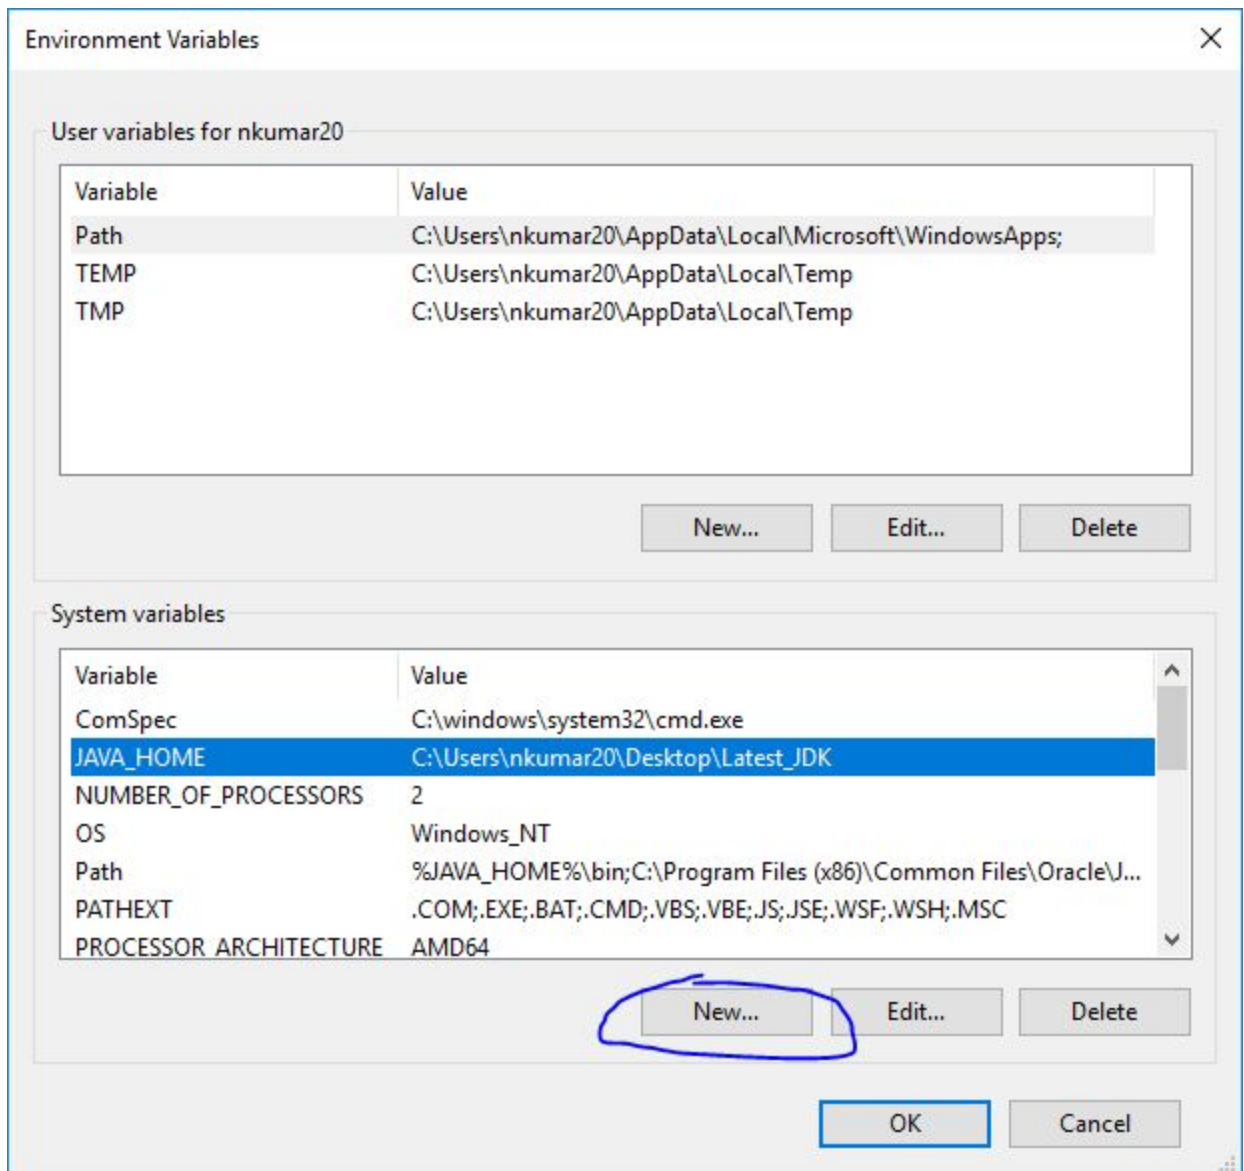

**Setting The Environment Variables:**

- 5) Click the icon for Windows in the bottom right corner of your screen (your keyboard may also have a Windows shortcut):

- 6) Type “Control Panel”  
7) Click System -> Edit the system environment variables  
8) Click Environment Variables

9) Under System Variables (on the bottom) click “New”

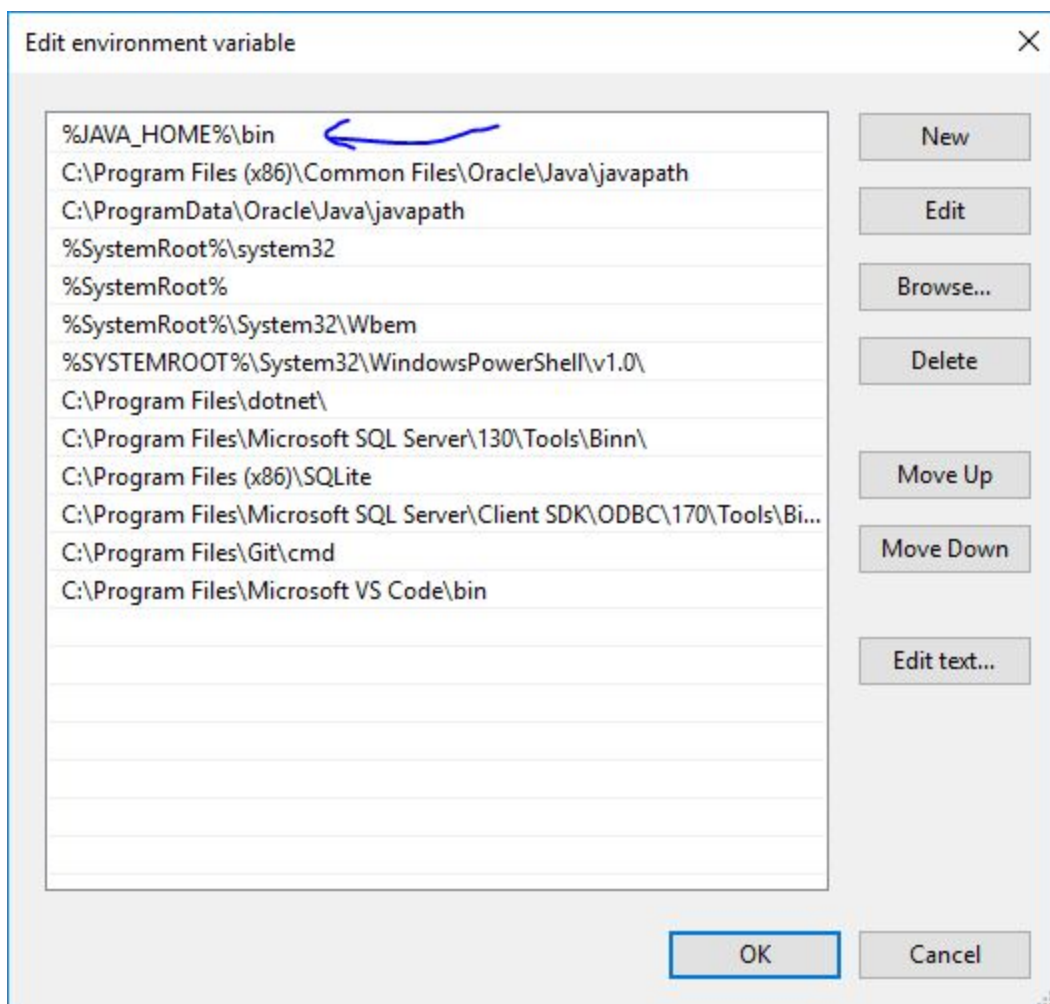

- 10) In the window that pops up, please fill the:
- Variable Name = “JAVA\_HOME”
  - Variable Value = Your Java Full Path (The one you set in Step 4,

please refer back there if you need this)

- 11) Next navigate back to System Variables (Refer to picture in Step 9), scroll down to “Path”, and click edit.
- 12) Next, click New. Type: “%JAVA\_HOME%\bin”
- 13) Make sure that this is at the top. To reorder items click Move Up or Move Down. The final Path should look *similar* to this:

- 14) Hit OK. You have successfully installed the latest JDK into your machine, and set the environment variables. *Optional:* To verify correct installation, you can open any shell and type “java -version”

### Part B - Maven Installation

- 1) The Maven installation is very similar to the Java Installation in the previous part. **Create a folder on your Desktop called “maven\_installation”**
- 2) In your web browser, please navigate to:  
<https://maven.apache.org/download.cgi>

- 3) Scroll down to the “Files” section and download the binary zip archive to the Desktop:

## Files

Maven is distributed in several formats for your convenience. Simply pick a ready-made binary distribution archive and follow the [installation instructions](#). Use a source archive if you intend to build Maven yourself.

In order to guard against corrupted downloads/installations, it is highly recommended to [verify the signature](#) of the release bundles against the public [KEYS](#) used by the Apache Maven developers.

	Link	Checksums	Signature
Binary tar.gz archive	<a href="#">apache-maven-3.6.2-bin.tar.gz</a>	<a href="#">apache-maven-3.6.2-bin.tar.gz.sha512</a>	<a href="#">apache-maven-3.6.2-bin.tar.gz.asc</a>
Binary zip archive	<a href="#">apache-maven-3.6.2-bin.zip</a>	<a href="#">apache-maven-3.6.2-bin.zip.sha512</a>	<a href="#">apache-maven-3.6.2-bin.zip.asc</a>
Source tar.gz archive	<a href="#">apache-maven-3.6.2-src.tar.gz</a>	<a href="#">apache-maven-3.6.2-src.tar.gz.sha512</a>	<a href="#">apache-maven-3.6.2-src.tar.gz.asc</a>
Source zip archive	<a href="#">apache-maven-3.6.2-src.zip</a>	<a href="#">apache-maven-3.6.2-src.zip.sha512</a>	<a href="#">apache-maven-3.6.2-src.zip.asc</a>

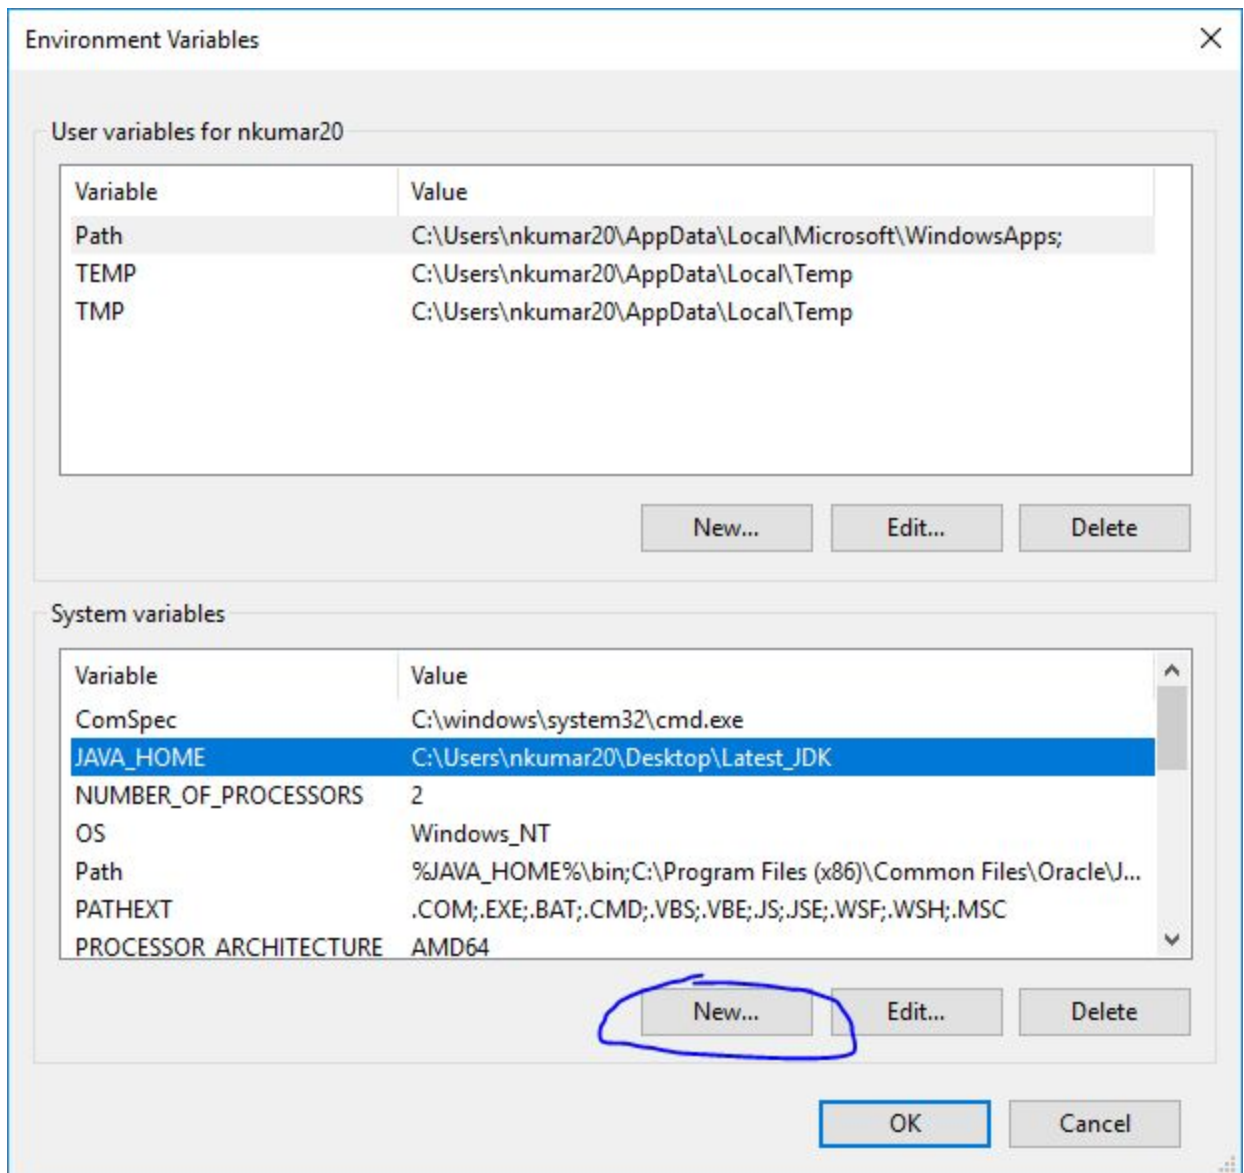

- [Release Notes](#)
- [Reference Documentation](#)
- [Apache Maven Website As Documentation Archive](#)
- All current release sources (plugins, shared libraries,...) available at <https://www.apache.org/dist/maven/>
- latest source code from source repository
- Distributed under the [Apache License](#), version 2.0

- 4) Click the icon for Windows in the bottom right corner of your screen (your keyboard may also have a Windows shortcut):

- 5) Type “Control Panel”
- 6) Click System -> Edit the system environment variables
- 7) Click Environment Variables

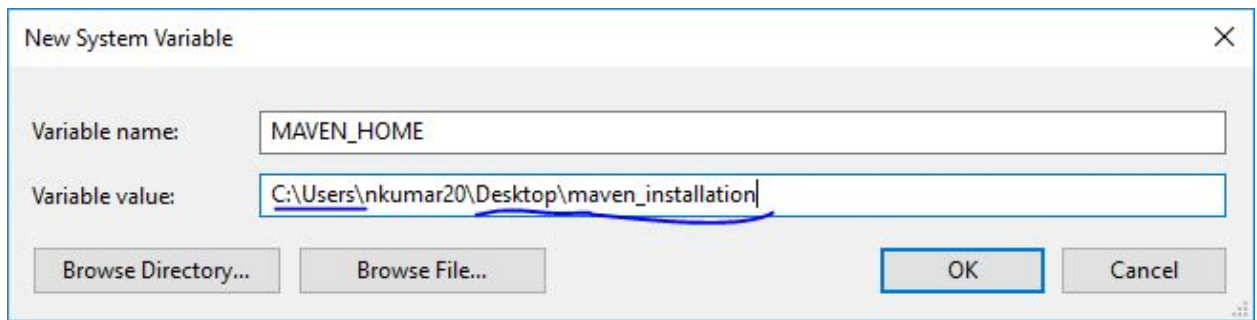

8) Under System Variables (on the bottom) click “New”

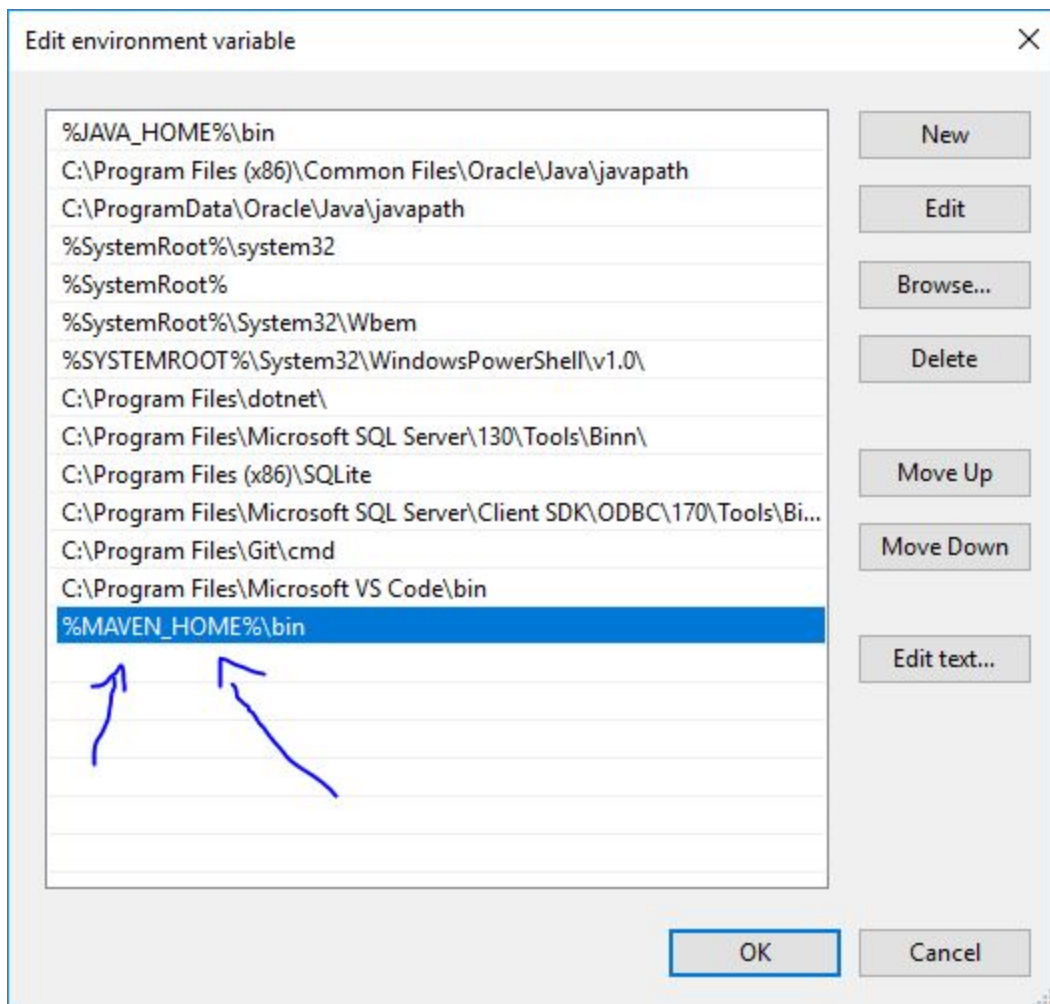

9) In the window that pops up, please fill the:

- Variable Name = “MAVEN\_HOME”
- Variable Value = Your Java Full Path (The one you set in Step 1,

please refer back there if you need this)

- 10) Next navigate back to System Variables (Refer to picture in Step 9), scroll down to “Path”, and click edit.
- 11) Next, click New. Type: “%MAVEN\_HOME%\bin”
- 12) The final installation should look *similar* to this:

- 13) Hit OK. You have successfully installed the latest Maven on your machine, and set the environment variables. To verify correct installation, you can open any shell and type “mvn -version”

## Part C - Ngrok Installation

- 1) Please navigate to <https://ngrok.com/download>, and download the latest version of Ngrok for Windows
- 2) Extract / Unzip this folder to your Desktop
- 3) Open the folder you downloaded it in, and open “ngrok.exe”

It should look like this:

```

C:\Users\nkumar20\Desktop\ngrok>ngrok.exe
Detailed help for each command is available with 'ngrok help <command>'.
Open http://localhost:4040 for ngrok's web interface to inspect traffic.

EXAMPLES:
ngrok http 80 # secure public URL for port 80 web server
ngrok http -subdomain=baz 8080 # port 8080 available at baz.ngrok.io
ngrok http foo.dev:80 # tunnel to host:port instead of localhost
ngrok http https://localhost # expose a local https server
ngrok tcp 22 # tunnel arbitrary TCP traffic to port 22
ngrok tls -hostname=foo.com 443 # TLS traffic for foo.com to port 443
ngrok start foo bar baz # start tunnels from the configuration file

VERSION:
2.3.35

AUTHOR:
inconshreveable - <alan@ngrok.com>

COMMANDS:
authtoken save authtoken to configuration file
credits prints author and licensing information
http start an HTTP tunnel
start start tunnels by name from the configuration file
tcp start a TCP tunnel
tls start a TLS tunnel
update update ngrok to the latest version
version print the version string
help Shows a list of commands or help for one command
  
```

- 4) Next, navigate to <https://dashboard.ngrok.com/auth> in your web browser.

- 5) Copy your Auth Token, by clicking the “Copy” button:

### Your Tunnel Authtoken

[Redacted Auth Token]

Copy

[Reset your authtoken](#)

You only need to do this one time.

```
./ngrok authtoken
```

You must specify your authtoken to ngrok so that your client is tied to this account. ngrok saves your authtoken in ~/.ngrok2/ngrok.yml so that you don't need to repeat this step.

- 6) Finally, go back to the Ngrok program. Please type: “ngrok authtoken <YOUR\_AUTH\_TOKEN>” - pasting the Auth Token you copied here. This hit enter. The final result should look like this:

```
C:\Users\nkumar20\Desktop\ngrok>ngrok authtoken 1234
Authtoken saved to configuration file: C:\Users\nkumar20\.ngrok2\ngrok.yml
```

## Part D: Installation Verification

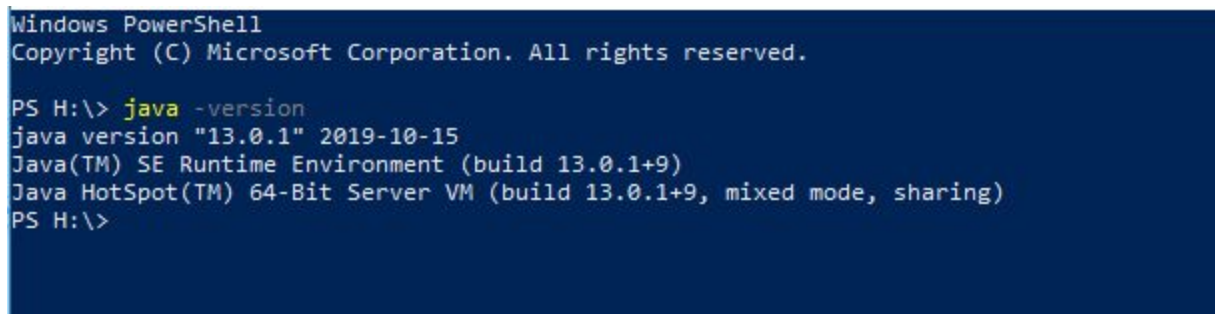

- 1) Click the icon for Windows in the bottom right corner of your screen (your keyboard may also have a Windows shortcut):

- 2) Type “PowerShell” and hit the enter key.
- 3) Your PowerShell window should look like this:

- 4) In PowerShell, type “java -version”. You should see an output detailing which version of Java is being run:

- 5) Next, type “mnv -version”. You should an output detailing which version of Maven is installed:

```
PS H:\> java -version
java version "13.0.1" 2019-10-15
Java(TM) SE Runtime Environment (build 13.0.1+9)
Java HotSpot(TM) 64-Bit Server VM (build 13.0.1+9, mixed mode, sharing)
PS H:\> mvn -version
H:\
Apache Maven 3.6.2 (40f52333136460af0dc0d7232c0dc0bcf0d9e117; 2019-08-27T11:06:16-04:00)
Maven home: C:\Users\nkumar20\Desktop\maven_installation\apache-maven-3.6.2\bin\..
Java version: 13.0.1, vendor: Oracle Corporation, runtime: C:\Users\nkumar20\Desktop\Latest_JDK
Default locale: en_US, platform encoding: Cp1252
OS name: "windows 10", version: "10.0", arch: "amd64", family: "windows"
PS H:\>
```

- 6) Congratulations! Java and Maven have been successfully verified!

## Booting Up

Now that we have all of the components necessary to run the application we can go ahead and run the application. To do this, we will download the project from Github, and then start Maven and then Ngrok using Powershell. After this, you will be able to communicate with the HoA website!

### Downloading The Project Files

- 1) On your Desktop, create a folder called "BOOTING\_UP"
- 2) In your web browser, please navigate to <https://gitforwindows.org/>
- 3) Click download.
- 4) Once the file is downloaded open the file. Click "Next" on the license agreement. **Important: Do not change the default options.**
- 5) The next page is Select Components. Click Next again on the next page. **Important: Do not change the default options.**
- 6) The next page is the default text editor. Click next again.
- 7) The next page is setting the PATH variable. Click next again. **Important: Do not change the default options.**
- 8) For the next 5 pages, click next until you reach the page where it says "Install"
- 9) Finally, click install.
- 10) Next open up Git Bash. (the new folder)
- 11) In Git Bash, navigate to your desktop, into the BOOTING\_UP folder you created earlier. Note: Use "ls" to list all contents in your current, and "cd" to change to a folder that you see.
- 12) Type the command "git clone <https://github.com/hondohondo/hoa.git/>"
- 13) After everything downloads, you will have to input the connection string in the folder  
`\HOA\hoa\backend\services\hoa-services\src\main\java\ServiceConstants.java`  
 va . You will have to retrieve the connection string via the Azure Web portal

for the MtAirDB, using the Mt Air Azure Account (registered with Terri L. - please contact for authentication details).

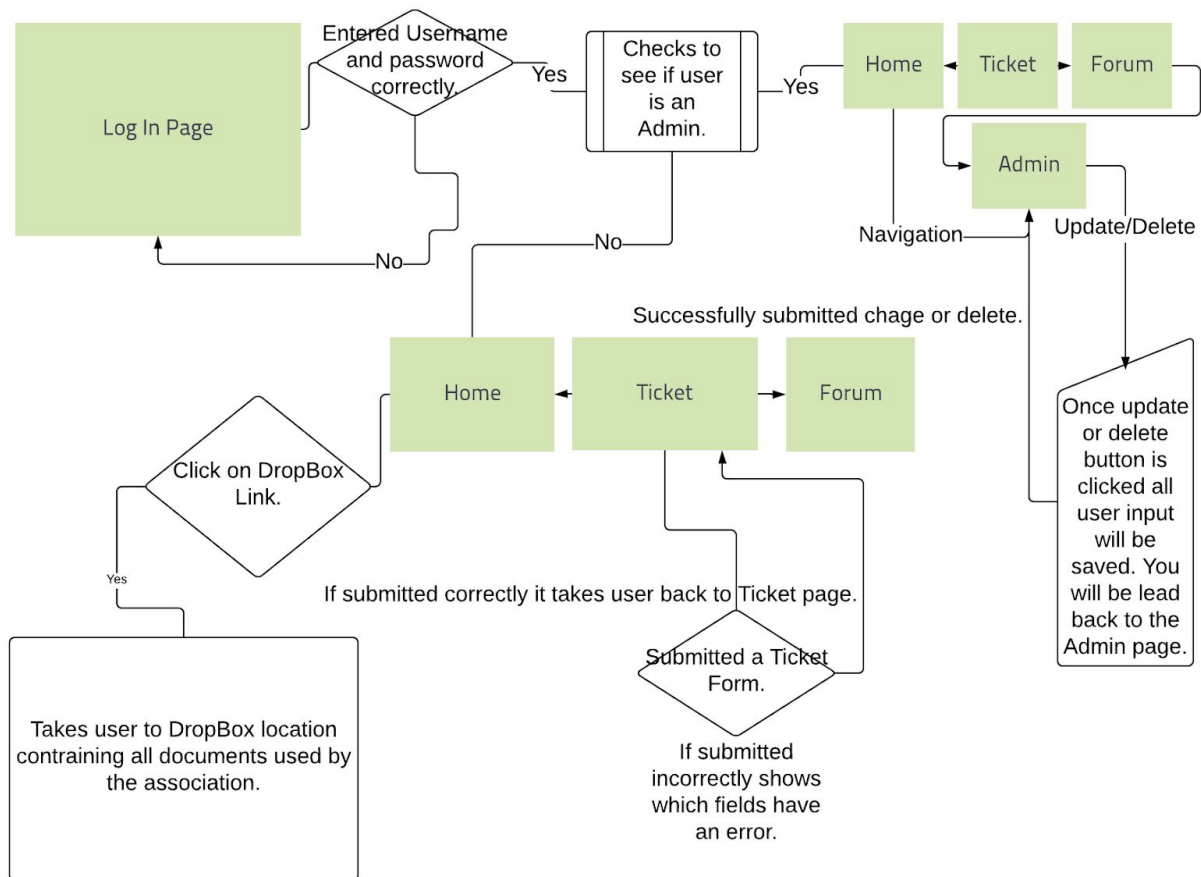

- 14) Open up the ServiceConstants.java and paste the Connection String in where marked. Take care to encapsulate this with parentheses and a semi-colon, ex: "<connection-string>";
- 15) Ensure that you have correctly input the password in the connection string.
- 16) Continue below:

## Starting Maven

1. Open PowerShell and navigate to the folder you cloned in step 12 using the "ls" and "cd" commands.  
***For Terri Only:*** This is on your desktop as "MtAirServer"
2. ***For Terri Only:*** Instead, use "cd c:\users\<your-windows-username>\Desktop\MtAirServer\"
3. Type: "cd .\HOA\hoa\backend\services\hoa-services\" and hit enter.
4. Type: "mvn: spring-boot:run" and hit enter.
5. Open ngrok
6. Type "ngrok http -subdomain=hoa.api 2772" and hit enter.
7. Congratulations, you have successfully started the program!

## Overview

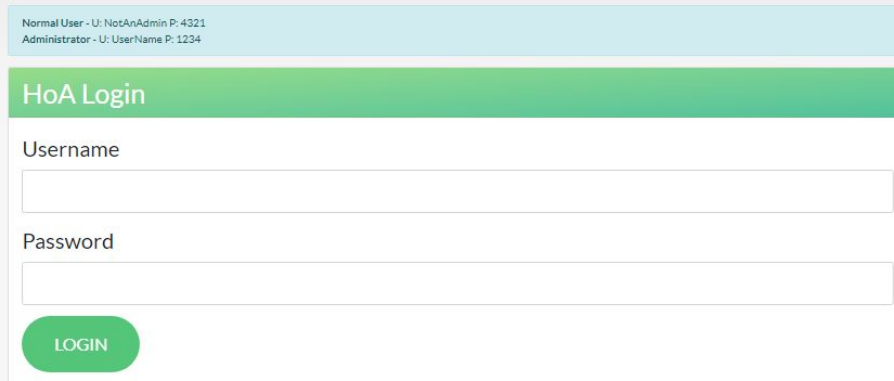

This is a diagram of how a typical user will experience their time on the website:

# Pages/Extensions

## 1. Login Page

**How to log in.**

Normal User - U: NotAnAdmin P: 4321  
Administrator - U: UserName P: 1234

### HoA Login

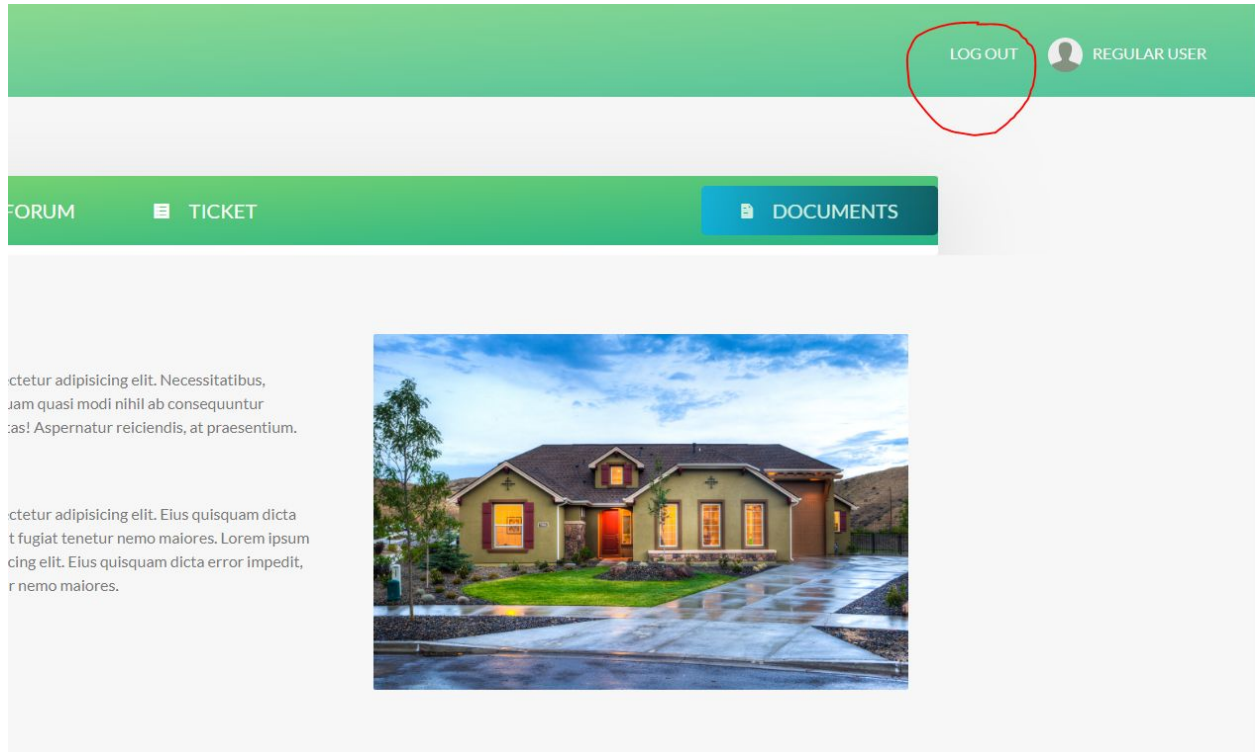

Username

Password

LOGIN

To log in, click on one of the input fields. It does not matter which you choose. Once you have selected an input field please type in the information relevant to that field. Such as typing your Username credential in the Username text box. When you have filled out both fields click the “Login” button.

### **How to log out.**

To log out please click the “LogOut” option in the top right corner of the page. The event will lead you back to the LogIn Page.

## 2.Navigation Bar

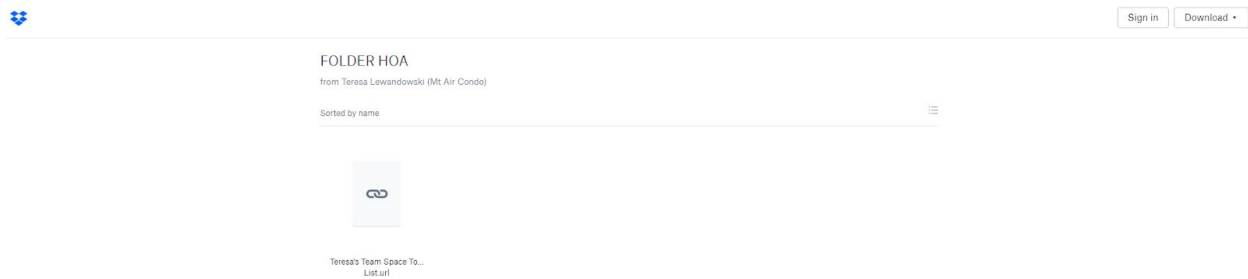

**How to use the navigation bar.**

- The red circle with the number 1 shows a white line next to a navigation option. This white line represents the current page that the user is on.

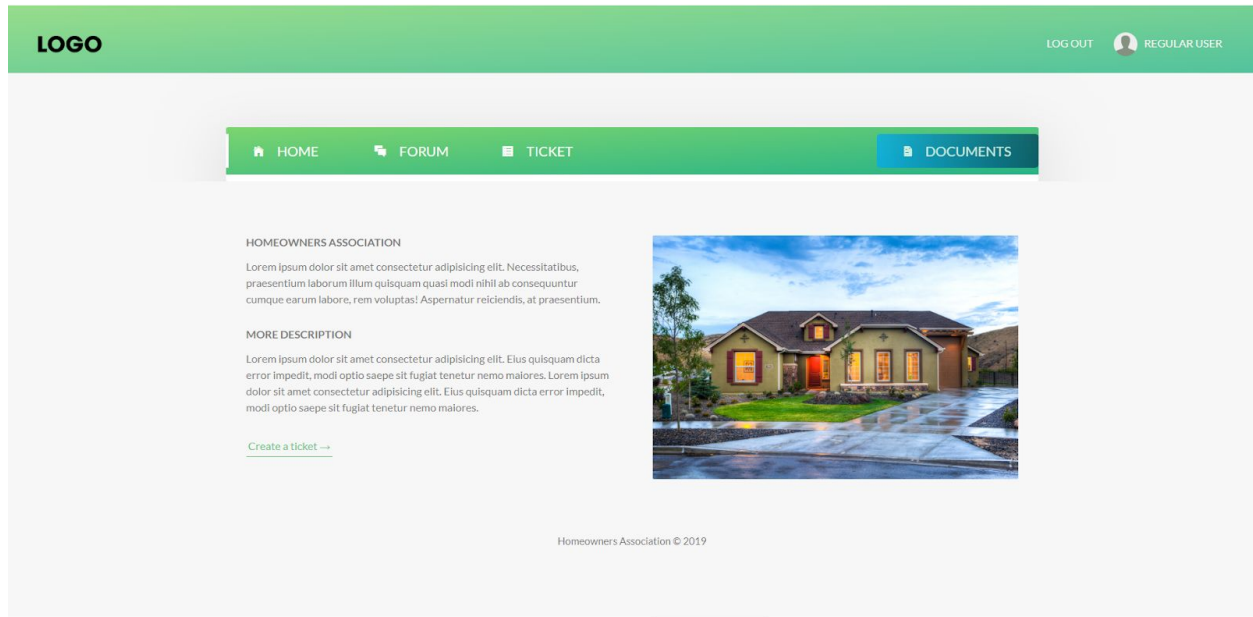

- The red circle with the number 2 shows a navigation option. If a user clicks on an option, they will be navigated to the page representing that option.
- The red circle with the number 3 is a navigation option leading to DropBox where all of the organization's documents will be stored.
  - Once clicked it will open a new tab with the DropBox information in this tab.

### 3. Home

- a. The home page has one functionality.
  - i. When a user clicks the “Create a Ticket” link they will be navigated to the Ticket page.

## 4. Ticket

### a. Ticket View:

### b. How to Submit a Ticket.

- i. Please fill out all fields of the form with valid responses.

- ii. Once you press submit, the program will send you an alert confirming the submission and return you back to the Ticket page.

localhost:4200 says  
Thanks for submitting a ticket!

1007	2019-09-26 07:46:37.12	Pat J. Hunter	Broken Window	true

- b. Selecting a ticket to view more details about the selected ticket.
- To select a desired ticket to view more information about it, click on the desired ticket in the table.
  - A modal should appear with the ticket's information:

The modal displays the following information:

- No:** 1171
- Time:** 2019-11-18 17:09:54.63
- Client name:** Testing
- Phone number:** 123-424-4242
- Subject:** Testing
- Active State:** (Dropdown menu)
- Ticket Message:** Testing, my house died.
- Append new message here:** Your message

Buttons: UPDATE, DELETE

- To exit out of the modal please click outside the modal space in the darker area or click the “X” button located on the top right corner of the modal.
- c. Updating a ticket.
- To update a ticket please keep the modal view up for the desired ticket.

- ii. The “Ticket Message” and “Active State” of a ticket can be changed.
1. To change the “Ticket Message” please type in the new message in the “Append new message here” text box.
  2. To change the state of a ticket please click on the “Active State” drop down box and select the desired result.
  3. Once all desired changes are made, click the Update button to update the selected ticket with the new changes.

The form consists of several input fields and two action buttons. At the top, there are two fields: 'Subject' with the value 'Testing' and 'Active State' with a dropdown menu currently showing 'false'. Below these is the 'Ticket Message' field containing 'Testing, my house died.'. Underneath that is the 'Append new message here' field containing 'Technical Writing user guide update.'. At the bottom of the form are two buttons: a green 'UPDATE' button on the left and a red 'DELETE' button on the right.

Field	Value
Subject	Testing
Active State	false
Ticket Message	Testing, my house died.
Append new message here	Technical Writing user guide update.

UPDATE DELETE

4. If the “Active State” drop down list is left blank, by default it will set the ticket as active.

d. Deleting a Ticket

- i. To delete a ticket please keep the modal of the desired ticket open.
- ii. To simply delete a ticket you have to click the “Delete” button found on the bottom right of the modal.

The image shows a user interface for managing tickets. At the top, a green confirmation modal is displayed with the text "ARE YOU SURE YOU WANT TO DELETE THE TICKET: 1171" and a close button (X). Below the modal, there are two buttons: a green "CANCEL" button and a red "DELETE" button. Below these buttons, there is a form for editing a ticket. The form has a grey background and contains the following fields:

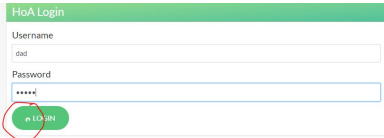

- Subject:** A text input field containing "Testing".
- Active State:** A dropdown menu with "false" selected.
- Ticket Message:** A text input field containing "Testing, my house died."
- Append new message here:** A text input field containing "Technical Writing user guide update."

At the bottom of the form, there are two buttons: a green "UPDATE" button and a red "DELETE" button.

- iii. There will be a confirmation pop up that will ask you if you are sure that you would like to delete the selected ticket.
  1. Clicking “Cancel” will take you back to the selected ticket’s modal.

2. Clicking “Delete” will delete the ticket and send you back to the Admin page.

## Troubleshooting

Problem	Problem Description	Possible Fixes
Infinite Login Loop	 <p>When trying to log into the site, if you are stuck for a long period of time (more than 2 minutes) check to see if there is a circle animation on the “LogIn” button circled in the picture above.</p>	To fix this issue please refresh your browser. To do this you can either click the refresh button on your browser or press “F5” on your keyboard.

## **Glossary**

1. **Alert** - A pop-up window at the top-middle portion of the page.
2. **Admin, Administrator** - A person with authority who has more access than a regular user.
3. **DropBox** - A website that handles document storage.
4. **Input/Input-Box/Text-Box** - A field that can be clicked upon and have characters typed into them.
5. **Logout** - To disconnect from the website.
6. **Login** - To connect as a user to the website.
7. **Modal** - A pop-up window that appears during an event.
8. **Navigation Bar/NAV** - The portion of the webpage that handles routing the user to other pages of the website.
9. **Password** - A user's given password for logging in.
10. **Routing/Transport** - To move to another page or a section of a page.
11. **Username** - A user's given credential to logging in.
12. **View** - Another term for a web page.
